Eminent Shortage Declaration

California's water year 2006-07 ended as one of the driest years on record, and there is the possibility of another dry year and potential supply interruptions. Central Basin invites you to a workshop to review and update your agency's Water Shortage Contingency Plans and prepare to implement them, if necessary.

Please review your agency's current drought plan, if available, and bring topics to discuss at the workshop.

**Lunch will be provided*
